Dear USPEXers,

We are happy to announce a new release of USPEX, version 9.4.4.

With the help of users (especially Ah Hui), and with our own testing, we found and fixed 19 bugs and improved Examples and Tests. This version is, to the best of our knowledge, bug-free. It is fully compatible with Octave 3.4 and partially compatible with Octave 3.6/3.8/4.0.

Contributors to version 9.4.4: M.S. Rakitin, Q. Zhu, M. Davari, S. Wang, F. Qi, G.R. Qian, A.R. Oganov.

This version is intended to be the current "golden standard" in computational materials discovery. Please switch to version 9.4.4, all previous versions of USPEX are obsolete.

Also, stay tuned – we are working hard on the new major release (version 10.1), which will take some time, but will feature major speedups and new functionalities.

Sincerely yours,
USPEX team
